UI & UX Design | Product Design | Figma | User Testing | Claude Design | Iconology & 3D Assets | Higgsfield AI | Google Stitch | Adobe After Effects | Adobe Illustrator | Adobe Photoshop | Canva | Affinity | Graphic Illustration | Brand Identity Design

CERTIFICATIONS

- UX Design Advanced Program by Lloyds Banking Group
- Adobe Design Fundamentals with AI
- Google UX Design Professional Certificate Coursera
- Human-Computer Interaction Specialization

EXPERIENCE

Senior Associate Design, Digit Insurance |On-Site: Bengaluru, KA | *July 2026 - Current*
Leading digital-first public insurance company across motor, health & travel

- Redesigned the Get Rewards journey with a dedicated redeem section and gamified unboxing interaction, driving a 6.5% uplift in offer redemption.
- Architected a 3D icon and asset system of 60+ reusable components, establishing a unified visual language governed at the design-system level.
- Rolled the 3D system across 5 core product touchpoints in collaboration with product and engineering, contributing to a 3.6% lift in widget CTR.
- Resolved wellness subscription discoverability by replacing a hidden category scroller with a high-visibility tab interface, lifting opt-ins by 2.3%.

Associate Designer — Digit Insurance | *July 2025 - June 2026*

- Overhauled the app authentication flow, introducing multi-category login paths and collapsing sign-in from 4 steps to 2 — driving a 30% increase in login completion.
- Established the Valueattics Re visual system and icon library, defining reusable components adopted across 5+ product surfaces.
- Modernized the desktop product catalog on godigit.com, restructuring browsing hierarchy and product-card layout — lifting engagement 11.6% and reducing bounce rate 3.4% on a live storefront.

Design Intern — Digit Insurance| *January 2025 - July 2025*

- Designed brand identity and event collateral for Lakshya'25, Digit's annual partner summit, translating executive strategy into a cohesive visual experience for 1,000+ attendees.
- Upscaled creative for 10+ seasonal and festive offer campaigns, extending a consistent visual language across digital and offline partner sales collateral.
- Designed RCS message templates, building interactive, brand-consistent creative for customer-facing offer campaigns**Tools & Platforms:** Figma, Adobe Creative Cloud (Photoshop, Illustrator), Affinity Suite, Prototyping

Product Design Intern, Between Boxes |On-Site: Gurugram, HR | *May 2024 – July 2024*
India's curated gifting brand across hampers, packaging & personalized experiences

- Led 0-to-1 design of a new e-commerce platform via user research and journey mapping, establishing it as the company's primary user acquisition channel.
- Designed a localized wedding registry and "E-Shagun" digital gifting flow, eliminating gift redundancy via curated catalogs to drive cultural product adoption.
- Developed a template-driven catalogue, reducing production time by ~35% and improving design consistency across multi-channel assets.

Tools & Platforms: Figma, Adobe Creative Cloud (Photoshop, Illustrator), Prototyping

PROJECTS

Element Store | Product & Design Systems Lead

- Architected a modular asset repository system that enforces semantic design rules, eliminating generation-to-edit friction by outputting structured, editable UI layers rather than flat raster images.
- Synthesized qualitative insights from 8 design practitioners to engineer an intent-based retrieval architecture, reducing design iteration rework by locking brand-approved constraints across generative cycles.

Swiggy FarmFresh | Product Designer (0→1 Concept)

- Conceptualized an end-to-end, trust-first e-commerce UX framework for Instamart across 14 componentized screens, incorporating live freshness tracking and seed-to-door visual journeys.
- Operationalized an evidence-based trust architecture—featuring a 96/100 Freshness Score engine and itemized pricing transparency—designed to increase category repeat-purchase rates and average order value (AOV).

Iconforge | Lead Product Designer (0→1 Concept)

- Designed a 0-to-1 AI product platform featuring a prompt-to-icon pipeline and token-level style rules to enforce cross-platform brand consistency across 16 visual systems.
- Executed 2 rounds of usability testing with 5 key personas, leveraging a persistent "Consistency Lock" feature to increase task completion from 62% to 90% and compress asset creation time from days to <10 minutes.
